

In
1902

This man started a company dedicated to providing his customers with forgings that exceeded the most stringent expectations of the metal working industry

100 years

ANDERSON SHUMAKER COMPANY
OPEN DIE FORGINGS SINCE 1902
ISO 9002 No. 1998/9444

1902

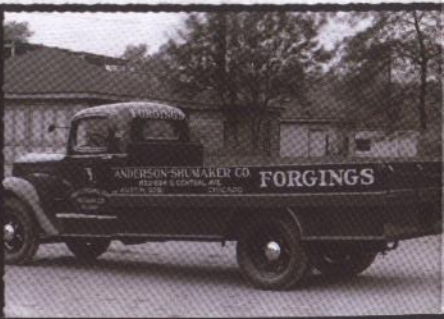

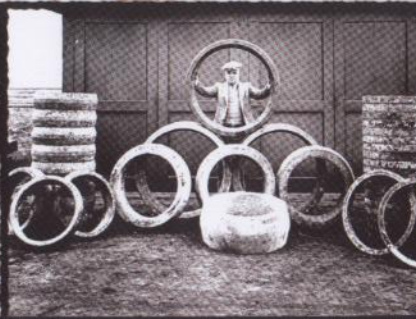

1902 *Carl F. Anderson, a forgemaster from Sweden, gathers together a dozen forging experts and with some financial support from A.A. Shumaker starts Anderson Shumaker Company on Chicago's near west side.*

1916 *With Anderson Shumaker's reputation for quality growing, Richard F. Anderson supports the war effort with various forged tank and artillery components*

1918 *Anderson Shumaker Co., requiring more space, moves to its present location, 824 S. Central Ave on Chicago's far west side.*

1929 *Continuing to solve customers tooling problems while building on their expertise in supplying specialty steel open die forgings, Anderson Shumaker installs a new 6,000 pound hammer.*

1935 *On-time delivery continues to be an important part of the Anderson Shumaker promise.*

2002

100

years and millions of forgings later,

we still focus on the same simple but important principles established by Carl Anderson back in 1902 – true excellence in quality and service. And that is why Anderson Shumaker Company has been privileged to play a vital role in the growth of hundreds of industries across this nation and around the world.

At Anderson Shumaker we hold fast to our tradition of producing quality forgings hammered with old-world pride and craftsmanship, and advanced with cutting-edge technologies – a tradition that has served to set the standard in our industry.

Beginning in 1902, we have forged a reputation of customer service and satisfaction that is the hallmark of our company. When you place an order with Anderson Shumaker, you will receive a forging that will stand up in service from a company that has been standing behind their products for one hundred years.

We celebrate our company's centennial by preparing to meet the demands of the next hundred years. Our experience sets us above the rest – and we will continue to be pioneers in responsive service programs, efficient production methods and state-of-the-art quality control procedures.

For the past century and into the next, there has been and still remains only one choice for excellence in product, accountability, service and on-time delivery –

ANDERSON SHUMAKER COMPANY

Open Die Forgings Since 1902

Anderson Shumaker again responds to the emergencies of war by supplying parts and tooling for the manufacture of ships, tanks, aircraft and armaments.

1941

Anderson Shumaker builds a new facility over the old, creating additional heat treat capabilities and space for continued growth.

1956

Installing new boilers, cutting and shipping departments helped Anderson Shumaker meet their customers requirements for quality and delivery.

1967

Anderson Shumaker constructs a 14,400 sq. foot addition increasing its in-house machining and cutting capabilities, while improving inventory control and trace ability.

1990

Just as in the days when Carl Anderson delivered forgings on a horse-drawn wagon, we meet and exceed our customer's most stringent expectations. Today, Anderson Shumaker forgings are orbiting the earth as part of the International Space Station.
